VACCINATIONS

SHINGLES VACCINATION

S\$360 (GST-inclusive)

Recommended for:

Adults aged 50 and above to gain immunity to shingles. This vaccination service is available to both foreigners and Singapore residents.

What is the Shingles (recombinant zoster) vaccine used for?

The shingles vaccine protects against shingles (herpes zoster), caused by the Varicella Zoster Virus (VZV)—the same virus responsible for chickenpox. After chickenpox, VZV can remain dormant and reactivate later in life, leading to shingles. Vaccination helps prevent this painful condition and reduces the risk of spreading the virus to others. The vaccine is administered as a 2-dose series, with the second dose given 2–6 months after the first. Completing both doses is essential for full protection.

HPV 9-VALENT VACCINATION

S\$270 (GST-inclusive)

Recommended for:

Male and female between the age of 9–26. Ideally administered before sexual activity begins. Adults aged 27–45 may also benefit, consult with a doctor to determine your suitability.

What is the HPV 9-Valent vaccine used for?

The HPV 9-valent vaccine offers advanced protection against nine strains of HPV, including those most commonly associated with cervical cancer and other cancers affecting the genital area, throat, and anus. It is recommended for both males and females as a preventive measure against HPV-related conditions.

RSV (RESPIRATORY SYNCYTIAL VIRUS) VACCINATION

S\$330 (GST-inclusive)

Recommended for:

Adults aged 60+ and certain high-risk individuals as advised by their doctor.

What is the RSV vaccine used for?

The RSV vaccine protects against Respiratory Syncytial Virus, which can cause severe respiratory illness such as bronchiolitis and pneumonia, especially in older adults and those with chronic heart or lung conditions.

PCV20 VACCINATION

S\$220 (GST-inclusive)

Recommended for:

Elderly aged 65 and above especially those with certain medical conditions and weakened immune systems.

What is the Pneumococcal Conjugate (PCV20) Vaccine used for?

Pneumococcal vaccines help to prevent pneumococcal disease caused by the bacteria *Streptococcus pneumoniae*. Pneumococcal disease includes infection of the lungs (pneumonia), ear (otitis media), brain (meningitis), blood (bacteremia) and other serious infections. Symptoms of pneumococcal disease vary depending on the infected organ. It can range from low-grade fever, cough, earache and chest pain, to more serious symptoms such as confusion or severe headaches.

VACCINATIONS

HEPATITIS A VACCINATION

S\$95 (GST-inclusive)

Recommended for:

Adults (18+ y.o.) who have not been previously vaccinated and lack immunity to Hepatitis A, as per Singapore's National Adult Immunisation Schedule (NAIS).

What is the Hepatitis A vaccine used for?

The Hepatitis A vaccine helps prevent infection caused by the Hepatitis A Virus (HAV), which can be spread through contaminated food or water. Symptoms include fever, fatigue, nausea, loss of appetite, jaundice (yellowing of skin or eyes), and abdominal pain.

HEPATITIS B VACCINATION

S\$55 (GST-inclusive)

Recommended for:

Adults (18+ y.o.) who have not been previously vaccinated and lack immunity to Hepatitis B, as per Singapore's National Adult Immunisation Schedule (NAIS).

What is the Hepatitis B vaccine used for?

The Hepatitis B vaccine protects against Hepatitis B Virus (HBV), a blood-borne infection that can cause chronic liver disease and liver cancer. Symptoms include jaundice, joint pain, abdominal discomfort, fatigue, and nausea.

MMR (MEASLES, MUMPS, RUBELLA) VACCINATION

S\$40 (GST-inclusive)

Recommended for:

Adults without prior vaccination or immunity, especially those born after 1970.

What is the MMR vaccine used for?

The MMR vaccine protects against measles (fever, rash, pneumonia), mumps (swollen glands, hearing loss), and rubella (fever, rash, joint pain). These are highly contagious diseases with potential complications.

These services can be booked independently or added as part of your health screening.

To book these independently of an Executive Health Screening, a doctor's consultation is required per dose. Schedule a consultation with our in-house GP at DA Orchard MedSuites (\$65 Consultation Fee) for expert medical advice and guidance tailored to your unique health needs. The fee encompasses both the initial consultation and a post-checkup review (where applicable). Please contact our staff for further information on this.
